

NORMAND[®]

SELF-LOADING SAND AND SALT SPREADER SCR

ECONOMIC

Normand's SCR spreader is perfect to spread sand, salt and other aggregate to control ice and snow on driveways, parking lots, side-walks and other applications.

QUICK LOADING - LABOR SAVING

This heavy duty spreader is easy to use. Use the hopper as a bucket in the lower position. Drive the tractor into the sand and load. Put the spreader in the upper position, start hydraulic control and spread the material. Can be operated by one person.

Quality - Sturdiness - Reliability

SPREAD

The flow of material spreaded is obtained by the control speed of the roller feeder as well as opening and closing of shutter.

FRONT MOUNTING

The Normand's SCR spreader can be fixed on most tractor's loader. Adjustables plates are installed on the spreader to receive various quick attachments available on the market.

REAR MOUNTING

The Normand's SCR spreader is also available to be installed on a category 2 tractor's 3-points hitch. However an hydraulic cylinder system is required.

INSTALLATION ON SKID-STEER

The Normand's SCR spreader can be installed on loader of skid steer. An optional attachment can be fixed on spreader to receive the quick attach's skid steer.
